DETAILED ACTION

1. This Office Action is a response to the communication filed July 10, 2003. Claims 1-9 are presented for examination.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This is because the specification does not appear to support the claimed limitation of "storage area for storing an address tag of an address of a cache data ...", as recited in claim 1, lines 4-5; and claim 6, line 5. Should "an address tag of an address of a cache data" be replaced with --an address tag of a cache data--?

Claim Objections

4. Claims 2, 4, and 7-8 are objected to because of the following informalities:
 - a. In claims 2, 4, 7, and 8 lines 1-2, "characterized in that" should be replaced with --wherein--for clarity.

Allowable Subject Matter

5. Claims 1-9 would be allowable if rewritten or amended to replace, in claim 1, lines 4-5 and claim 6, line 5, "an address tag of an address of a cache data" with --an address tag of a cache data--. The claims would be allowable over the prior art of record because none of the prior art of record teaches or fairly suggests the claimed operation of generating a valid bit for showing presence of

validity of a cache data basing on the "first valid bit" and the "second valid bit", as recited in the independent claims 1, lines 4-12; and claim 6, lines 5-12.
